# One Color Looking Like Two Colors

# Two Colors Looking Like One Color

# **Why Color Choices Matter in Data Visualization**

Information should not be  
displayed in a way that distorts or  
misrepresents the underlying data.

*Edward Tufte, statistician, writer, and artist*

In order to use color effectively,  
it is necessary to recognize that  
color deceives continually.

*Josef Albers, artist and educator*

# Influential Factors

Color Weight

Color Temperature

# Color Weight

# Color Weight

# Color Weight

**high contrast = uneven weight**

**low contrast = even weight**

# Choosing a Color Palette

# Conventional Advice

# Conventional Advice

Palettes used by graphic designers are, by necessity, unbalanced.

# Conventional Advice

Palettes used by graphic designers are, by necessity, unbalanced.

**Better Advice**

# Start with a Designer Palette

and make it balanced

# Adjusting Color Pairs

# Adjusting Color Pairs

# **Four Strategies for Balancing Your Color Palette**

# 1. Use an Intuitive Color Space

**OKLCH or HSL**

**Hue**

**Chroma**

**Lightness**

# 1. Use an Intuitive Color Space

 **OKLCH or HSL** 

## 2. Use a Contrast Checker in Reverse

**Contrast ratio: 1.05**

**Contrast ratio: 1.12**

# 3. Go Grayscale

original

balanced

# 4. Shush the Loudmouths

# 4. Shush the Loudmouths

- Desaturate them

# 4. Shush the Loudmouths

- Desaturate them
- Saturate other colors

# 4. Shush the Loudmouths

- Desaturate them
- Saturate other colors
- Change the background to counter their influence

# Final Thoughts

The commonality between  
**science** and **art** is in trying to see  
profoundly: to develop strategies of  
seeing and showing.

*Edward Tufte, statistician, writer, and artist*
